SUMMARY

I am a final-year Informatics student at the University of Science and Technology of Hanoi, with strong analytical and creative skills and a solid foundation in AI agents, large language models (LLMs), and software engineering. Guided by Christian values of integrity and responsibility, I aspire to build my career as a Software Engineer.

EXPERIENCE

Hanoi

Jul 2021 - Sep 2021

Front-End Internship

Zland

- Interned in developing the front end for a real estate website using CSS and ReactJS.
- Developed responsive static websites with required features from clients.

Hanoi

Mar 2023 - Sep 2023

Intern AI Engineer

Aimelab - Aimesoft

- Interned for 6 months in the field of natural language processing for personal projects.
- Optimized and tested LLM models such as GPT-2, Pegasus, CLIP, and LLaMA; contributed to the Aimetalk project.
- Built an interactive LLM chat web application mainly using VectorDB, ReactJS, and NodeJS.

Hanoi

Jun 2024 - Mar 2025

Fresher Fullstack

SpringAI

- Interned for 3 months and worked as a collaborator on an internal application in the e-commerce field.
- Took part in building a chat system with an agentic workflow.
